MLSA Internship projects

Project 1

"This React-based to-do list app lets users seamlessly manage their tasks. Users can add new tasks, edit existing ones to update details, and delete tasks when they're completed or no longer needed. Designed to be intuitive, the app offers a streamlined way to stay organized and track daily goals."

Project 2

"*Min Doc* is a React-based note-taking app inspired by Google Keep. It allows users to quickly jot down notes, edit them as needed, and delete notes that are no longer useful. Perfect for organizing thoughts, reminders, or ideas, *Min Doc* provides a straightforward and efficient way to keep track of information."
